

RGB/W LED Drivers – DMX Constant Current

- RGB and RGBW
- Ultra smooth DMX dimming
- Thermally protected
- 50W Max output
- 4 x 350 mA, 3-12.5 W per chanr

Light Symphony Solution

This LED driver is compatible with all Light Symphony's RGB/W lighting controllers, including the 1-Zone (LS30600RGBW) and the 4-Zone (LS30540RGBW).

It provides smooth colour control and dimming of constant-current (series wired) LEDs. It's compatible with most LED brands, including Collingwood, Aurora, LuxR, Elipta, and Light Symphony's own. Each of the 4 outputs is rated up to 42V at 350mA and so complies with the 'Safety Extra Low Voltage' regulations.
